

Description of the Problem

The Chinatown in Manhattan, New York City is an interesting place to visit for tourists, especially for those who have Chinese origins (to see what the Chinese people's lives are like in such a big multicultural city). It will be very helpful to list the venues worth a visit in and around Chinatown for these sightseers as they may not be familiar with Chinatown and may get lost easily.

Description of the Data

The location data from Foursquare will be used to sort out and list the top venues in and around Chinatown.

Methodology

I used the New York neighborhood dataset provided at [“https://geo.nyu.edu/catalog/nyu_2451_34572”](https://geo.nyu.edu/catalog/nyu_2451_34572), and then I retrieved the top 100 venues data around Chinatown (the radius is 1000 meters which is an okay distance for a walk) by calling Foursquare's API.

Results

100 venues around Chinatown are successfully pulled from Foursquare and then used to populate the table (the screen capture shows the first 21 venues only). Also, addresses and “Cross Street” information are provided so that the venues can be found more easily:

Discussion

Some Chinese characters show up at the venue “The Original Chinatown Ice Cream Factory”. I think it is a good idea for visitors who know Chinese to learn more about what the venue

is about by checking them, but maybe one more data field called “venue’s name in languages other than English” should be created at Foursquare for such cases.....as sometimes these double-byte characters can cause trouble in English-based programs / APIs.

Conclusion

There are sure quite many venues to visit around Chinatown.

Why not use this decent guide to check around when you visit

Chinatown next time? 😊
